

Working Together to Improve Street Services

Street services such as leaf collection, sweeping, pothole patching and storm response are now being provided by Eugene Public Works on all streets in the River Road area south of Beltline Highway.

Lane County and the City of Eugene agreed to the operational transfer September 2014 to increase service efficiencies and make it easier for residents to know which agency to call if street services are needed. The transfer includes the properties north of Maxwell Road to Beltline Highway and west of River Road to Northwest Expressway. Properties south of Maxwell already are being served by the City of Eugene.

In exchange, Lane County agreed to serve all properties north of Beltline, including streets that previously served by Eugene Public Works.

The updated intergovernmental agreement also includes a small number of properties on 30th Avenue and Spring Boulevard, Dillard Road, North Gilham Road, Floral Hill Drive, Honeywood Avenue, Marjorie Avenue and Downing Street

There should be no significant changes in the type or frequency of street services for residents in any of these areas.

Operational Maintenance Activities Included in the IGA:

- [Street sweeping](#)
- [Storm line and catch basin cleaning](#)
- [Leaf pick-up](#)
- [Dead animal and debris removal](#)
- [Pothole and hazardous condition response](#)
